

GENERAL FEATURES

- ▶ **Security against identity fraud (spoofing)**
Patented electronic life detection mechanism
- ▶ **Anti-tampering security**
Anti-tampering mechanism embedded in a one-piece resin based enclosure

TECHNICAL FEATURES

- ▶ **Connection system**
Terminal connects to any PC via USB connector
- ▶ **Storage capacity**
MicroSD memory of up to 64 GB
- ▶ **Storage security**
The recording of data is electronically encrypted
Only the terminal's owner can access the data stored in it
- ▶ **Biometric sensor**
Capacitive swipe sensor
- ▶ **Weight**
50 grams
- ▶ **Dimensions**
56x84.25x19.15 mm (W x L x D)
- ▶ **Secure communications and transactions**
Electronic encryption using nonlinear key generator
All information related to every transaction is encrypted in the terminal itself, not in the PC
Unique identification number
Time-stamping mechanism
Digital Signature mechanism
- ▶ **False Acceptance Rate (FAR)**
1:1 authentication mode FAR: 0.00001%
- ▶ **False Rejection Rate (FRR)**
1:1 authentication mode FRR: 0.001%
